

# BorrePlex<sup>®</sup> OA (Liquid)

LignoTech USA, Inc.  
100 Grand Avenue  
Rothschild, WI 54474  
Tel: (715) 359-6544  
Fax: (715) 355-3674

## GENERAL INFORMATION:

**BorrePlex OA** is a mixture of calcium lignosulfonate and lignosulfonic acid.

**BorrePlex OA** is a chelating agent for micronutrients.

**BorrePlex OA** can also be used to dissolve carbonate scale and chelate calcium in drip irrigation lines.

Notice: The statements made on this label are believed to be true and accurate but because of conditions of use which are beyond our control, LignoTech USA does not authorize any agent or representative to make any warranty, guarantee or representation, expressed or implied, concerning this material or the use thereof, except in conformity with the statements on this label. Neither LignoTech USA nor the seller shall be responsible in any manner for any property damage or personal injury resulting from the use of this material not in accordance with directions. The buyer assumes all risk and liability resulting from improper handling, storage or use and accepts and uses this material on these conditions.

Information regarding the contents and levels of metals in this product is available on the internet at <http://www.aapfco.org/metals.htm>.

## GUARANTEED ANALYSIS

Calcium (Ca).....1.0%  
Sulfur (S).....1.5%

Derived from calcium lignosulfonate and lignosulfonic acid.

Contact your LignoTech Sales Representative for additional information.

**KEEP OUT OF REACH OF CHILDREN  
CAUTION: Harmful if swallowed.**

Always consult the Material Safety Data Sheet for instructions on proper handling.

**This product is intended for use according to an approved organic system plan.**

Net Contents: 275 gallons (1040 liters)  
Net weight: 10.6 lbs/gallon (1.3 kg/l)

## GUIDELINES FOR USE:

**BorrePlex OA** is a chelating agent for micronutrients.

Use rates generally range from 1 to 2 pounds of BorrePlex OA per pound of chelated metal.

Micronutrients formulations prepared from **BorrePlex OA** should be applied alone. They should be applied foliarly. Application rates should be determined from a soil analysis.

When used to dissolve carbonate and chelate calcium in drip irrigation pipes, **BorrePlex OA** should be applied at a rate of 1-2 pints per 100 gallons of irrigation water.

Follow label rates as well as the recommendations of your field person and LignoTech representative.

Always consult the Material Safety Data Sheet for instructions on proper handling.
