Science Citrus Mix

Magnesium (Mg).....	1.30%
1.30% Chelated Magnesium (Mg)	
Boron (B).....	0.80%
Cobalt (Co).....	0.001%
0.001% Chelated Cobalt (Co)	
Iron (Fe)	1.60%
1.60% Chelated Iron (Fe)	
Manganese (Mn)	4.00%
4.00% Chelated Manganese (Mn)	
Molybdenum (Mo).....	0.08%
Zinc (Zn)	4.00%
4.00% Chelated Zinc (Zn)	

Derived From: Magnesium EDTA, Cobalt EDTA, Iron EDTA, Manganese EDTA, Zinc EDTA, Boric Acid and Ammonium Molybdate.

Chelating agent is EDTA (ethylenediaminetetraacetic acid).

WARNING

Suspected of damage to fertility or the unborn child

Wash face, hands and any exposed skin after handling. Do not eat, drink or smoke when using this product. If swallowed, call a Poison Center if you feel unwell. Rinse mouth.

EYE CONTACT: Immediately flush eyes with plenty of water for at least 15 minutes, while holding eyelids apart to ensure flushing of entire surface. Call a physician.

SKIN CONTACT: Immediately flush skin with plenty of water for at least 15 minutes, while removing contaminated clothing and shoes.

INHALATION: Remove to fresh air. If not breathing, give artificial respiration, preferably mouth-to-mouth. If breathing is difficult, give oxygen. Call a physician.

INGESTION: If swallowed, DO NOT induce vomiting. Rinse mouth with water. Dilute stomach contents by drinking water. If vomiting occurs spontaneously, keep head below hips to prevent breathing vomit into lungs. NEVER GIVE ANYTHING BY MOUTH TO AN UNCONSCIOUS PERSON. Call a physician immediately!

GENERAL INFORMATION

Citrus Mix gives best results when crops have adequate supplies of water and major nutrients, and are not under stress for other reasons. Conditions which are responsible for one particular deficiency can also induce deficiencies of other trace elements.

Citrus Mix is particularly suitable for foliar application and for general soil applications. Foliar fertilization is intended as a supplement to a regular fertilization program and will not, by itself, provide all the nutrients normally required by agricultural crops. Plants need only very small amounts of micronutrients for maximum growth.

MIXING

Citrus Mix is soluble in water. When mixing, do NOT pre-mix a small amount of water before adding to the spray tank. **Citrus Mix** should be added slowly to the majority of the spray water volume while it is being agitated. Agitation should continue for a minute or two after the addition of **Citrus Mix**. If pesticides are to be used in the spray mix, add them after the **Citrus Mix** has dissolved.

RECOMMENDED RATES

Foliar applications - use 1/2 to 1 lb. of **Citrus Mix** per acre.

Soil applications - use 1/2 to 2 lbs. of **Citrus Mix** per acre through drip, microjet or other soil delivery systems.

CAUTION: Do not apply more than 1 lb. per acre of **Citrus Mix** per foliar application as crop injury may occur. Multiple applications should be made at no less than 10 to 14 day intervals to reduce the potential for crop injury.

Wash hands with soap and water before meals and after work. Store in the original container tightly closed, in a dry place. Store away from children, pets, livestock and foodstuffs.

Information regarding the contents and levels of metals in this product is available on the internet at <https://www.aapfco.org/metals.html>

Use this product in accordance with good agronomic practices, which include utilizing proven spray equipment set for proper coverage. Do not make applications when temperatures are too hot, as crop damage may occur. Applications should be made at temperature levels and when other environmental conditions in your area are such that your experience indicates the application will be compatible and will accomplish the desired result.
