BIOSTIMULANT

#### INCLUDED CROPS

CUCURBITS

TOMATOES

PEPPERS

PLANT GROWTH REGULATOR

Soline™ is a novel biostimulant and multi-active plant growth regulator containing Auxin, Gibberellin, and the unique active Homobrassinolide (HBR).

This blend of plant growth hormones, fortified with proprietary abiotic stress reduction technology, is designed to promote plant growth and mitigate early-season environmental stressors.

**Soline™ can help your crop reach its maximum potential with its powerful combination of technologies.**

#### FEATURES

**CONTAINS THREE ACTIVE INGREDIENTS – AUXIN, GIBBERELLIN, AND NEW-GENERATION HOMOBRASSINOLIDE (HBR)**

**FORTIFIED WITH A PROPRIETARY BLEND OF BIOSTIMULANT COMPONENTS TO SUPPORT AND FACILITATE PLANT RESPONSES TRIGGERED BY PLANT GROWTH HORMONES**

**CONVENIENT, EASY-TO-USE, LIQUID FORMULATION**

PLANT GROWTH REGULATOR

## APPLICATION

KEY CROPS INCLUDE, BUT ARE NOT LIMITED TO: TOMATOES, CUCURBITS, PEPPERS

FOLIAR OR IN FURROW

CAN BE APPLIED IN COMBINATION WITH STARTER OR POP-UP FERTILIZERS.

CAN BE APPLIED IN COMBINATION WITH FUNGICIDES, INSECTICIDES, OR HERBICIDES

REVIEW LABEL FOR SPECIFIC APPLICATION RATES AND RECOMMENDATIONS

## BENEFITS

**HELPS TO REDUCE  
EARLY SEASON  
CROP STRESS**

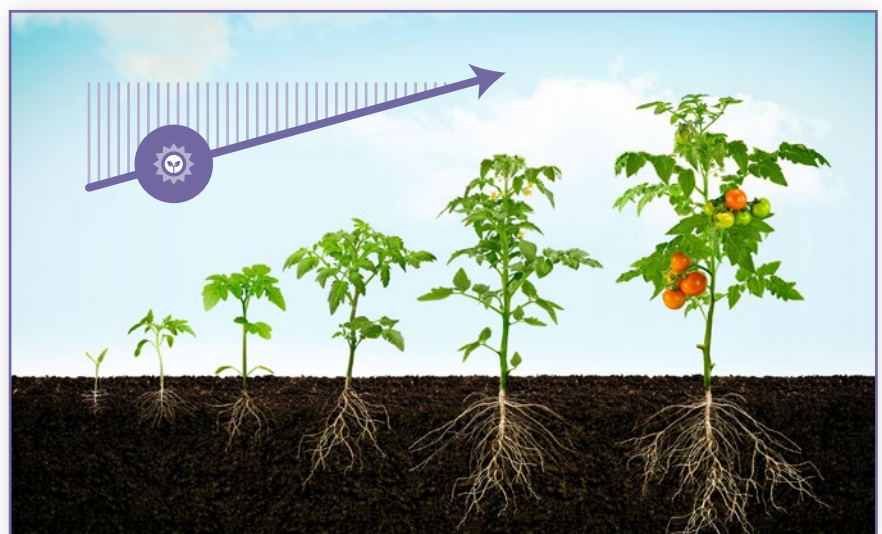

**STIMULATE CELL  
ELONGATION**

**PROMOTE ROOT  
EXPANSION**

## HOW IT WORKS

Plant Growth Regulators (PGRs), like Soline™, stimulate the plant's ability to remain productive even during times of stress. Soline™ is a novel biostimulant and multi-active plant growth regulator, designed to promote growth and reduce early-season abiotic stress. - Homobrassinolide, Auxins, and Gibberellin work together to help stimulate root growth and cell expansion. Soline™ is ideal for use when trying to get plants off to a faster vegetative start under cool soil conditions and keep them going during times of stress.
